2022 Vol. 1

Cover Story

The Greater Bay Area Computing Hub to Bring Digital Infrastructure Development Opportunities

The Guangdong - Hong Kong - Macau Greater Bay Area (Greater Bay Area) is part of a strategic national development action plan aiming to transform the region into a world-class technology and innovation hub for emerging industries.

Capitalizing on the innovation-driven economic growth and rapid development in the Greater Bay Area, OneAsia's new data center project - Guangzhou Data Center Park is expected to start operation in Q1 2024. Located in Guangzhou HuangPu District, it covers a gross floor area of 76,955 square meters featuring an IT power capacity of 42.5MW.

To build a hub node in the integrated national computing network for the Greater Bay Area and meet the real-time computing power demand from the countries nearby, OneAsia also expands its presence in Busan, North Bangkok, and Greater Tokyo.

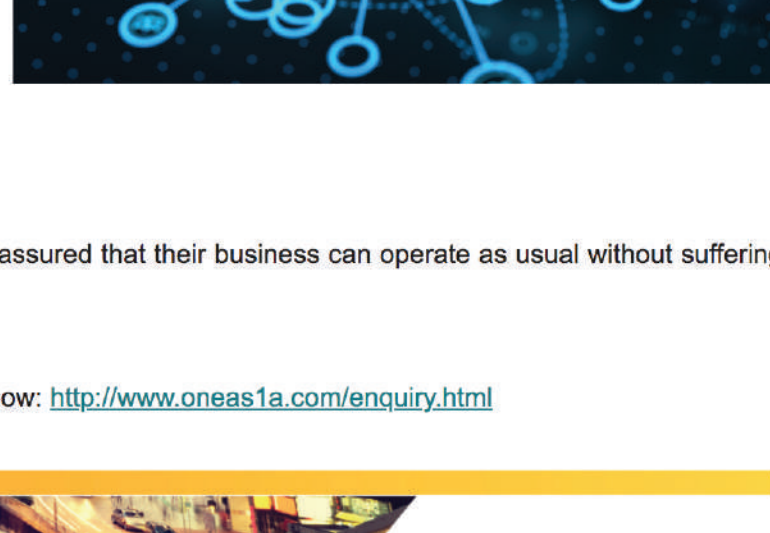

Our data center in Korea is located at Mieum Industrial Park in Busan - Jinhae Free Economic Zone. The site covers approximately 88,000 square meters with an IT power capacity of 74MW. It is expected to start operation in Q2 2024. We believe this campus will be a North Asia regional critical IT hub and a springboard for multi-national internet-based companies to enter the Korean market.

Meanwhile, the construction of the North Bangkok and Greater Tokyo data centers is in full swing. They are expected to commence operation at the end of Q4 2022 and Q4 2024 respectively.

Product Updates

Express Connect to Any Cloud - The Genuine Resilient Public Cloud Connection

As a carrier-neutral data center operator, OneAsia introduces the proprietary Express Connect to Any Cloud (ECAC) advanced cloud connect service. It is composed of two virtual circuits with dual service providers, delivering seamless and double resilience to ensure uptime while preventing any single point of failure from the other telecommunication carriers.

ECAC facilitates a dedicated network connection between customer's premises and different cloud platforms with on-demand cloud connectivity. It is a brand new solution in the market by using dual connectivity service resilience solutions.

With this innovative network solution, our customers are rest assured that their business can operate as usual without suffering from cloud service provider outage.

Project Updates

Data Center Transformation for a Global Telecom Service Provider

OneAsia is committed to providing an all-in-one data center transformation service to our customers. We are pleased to be appointed to provide secure colocation service by a global telecommunication service provider which has a presence in 29 countries across the world.

Thanks to the strong support of a team of experts from our subsidiary - Newtech, we delivered a high standard digital infrastructure within a month. Despite the tight project schedule, this deployment provides a peace-of-mind new online system and application for customer's business development.

Providing Robust Internet Connection to a Global Leading Food Company

OneAsia's 'Express Internet' provides reliable and seamless network performance for all global internet access. Recently, OneAsia has been working closely with a leading food company by deploying 'Express Internet' with a stable and low redundancy of global internet access and SaaS applications within their multi-national branches.

The project scope included on-site CPE installation and setting up of SD-WAN edge routers for the closest PoP routing with the best path selection. All traffic utilized our inter-data center backbone and dedicated cross-border internet, which comply with MIT guidelines.

China-Based Online Game Giant Adopting Colocation and Connectivity Strategy

OneAsia was appointed to provide secure, resilient, and scalable colocation solutions with Shanghai-Hong Kong cross-border connectivity for a Shenzhen based global online game pioneer.

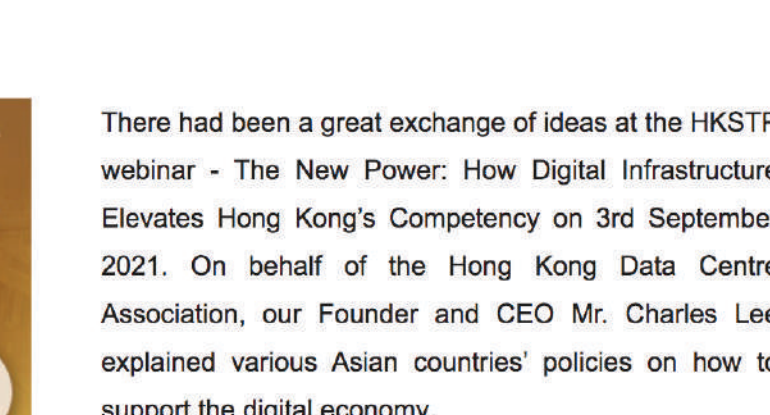

To meet the customer's global business expansion through the digital transformation journey, we offered 100 racks hosting, multiple GE IEPL connectivity, internet access across China and Hong Kong, and a 7x24 round-the-clock supporting service.

Moreover, riding on our local support team's expertise and capability in Shanghai, we completed the project within 6 months.

Event Highlights

New Consumption New Business Digital Intelligence Future Summit

OneAsia's team joined the captioned summit at Radisson Collection Hotel, Yangtze Shanghai on 23rd July 2021. We are honored to receive the Retail Digital Solutions Award and demonstrated our revolutionary tunnel-free SD-WAN solution, diversified connectivity across Greater China to the industry experts and guests.

OneAsia in the HKSTP Webinar

There had been a great exchange of ideas at the HKSTP webinar - The New Power: How Digital Infrastructure Elevates Hong Kong's Competency on 3rd September 2021. On behalf of the Hong Kong Data Centre Association, our Founder and CEO Mr. Charles Lee explained various Asian countries' policies on how to support the digital economy.

Upcoming Event

Cloud Expo Singapore 2022

Save your spot for 20th to 21st October! Our expert will share OneAsia's next-generation SD-WAN solution during the speaking session of Cloud Expo Asia at Marina Bay Sands, Singapore.

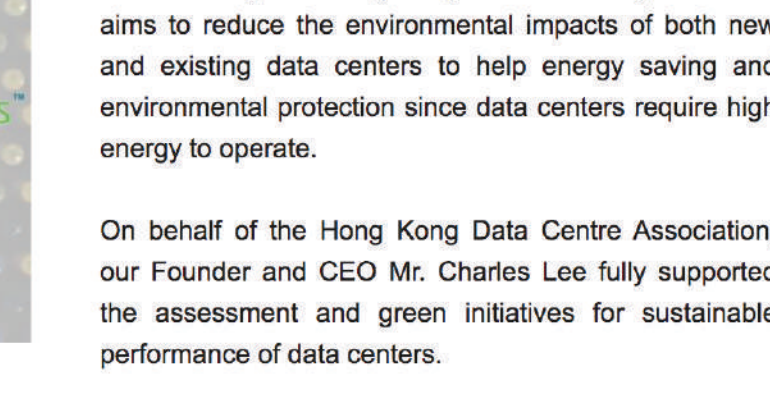

Stay tuned for the latest event details: <https://www.cloudexpoasia.com/>

Media Coverage

Hang Seng Commercial Banking 'From Impossible to Boundlessly Possible' Promotion Video Series

OneAsia is honored to be invited by Hang Seng Commercial Banking to share our experience of elevating our business to the next level. Our team of talented specialists pledges to integrate state-of-the-art and innovative technologies into our data center infrastructure and service solutions to keep our customers well connected at any time and from anywhere.

Discover how we bring the impossible innovative ideas to the boundlessly possible: <https://bit.ly/3i7Nm0x>

Featured in 'BEAM Plus Data Centres' Video

'BEAM Plus Data Centres' is a green building rating tool introduced by The Hong Kong Green Building Council. It aims to reduce the environmental impacts of both new and existing data centers to help energy saving and environmental protection since data centers require high energy to operate.

On behalf of the Hong Kong Data Centre Association, our Founder and CEO Mr. Charles Lee fully supported the assessment and green initiatives for sustainable performance of data centers.

Accomplishments

We are a Certified CLP Renewable Energy Partner

We are honored to be recognized as one of the CLP Renewable Energy Partners through purchasing electricity produced by local renewable energy sources including solar power, wind power, and landfill gas projects.

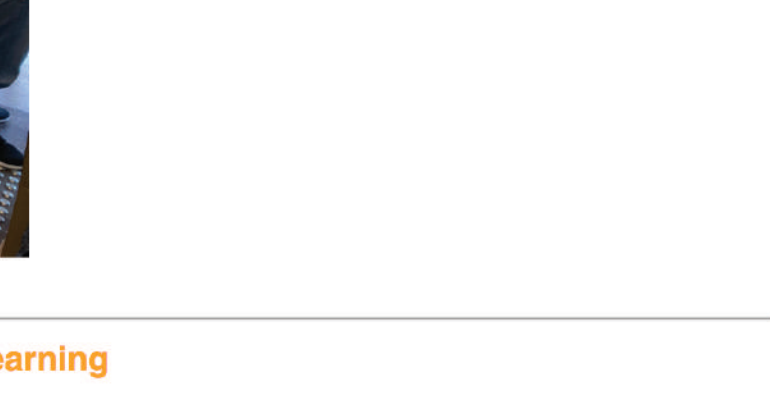

OneAsia will continue deploying green innovations such as Data Center Infrastructure Management (DCIM) solution, advanced cooling systems, and renewable energy to minimize carbon footprint and enhance energy management in our data centers.

Corporate Social Responsibility

Swing and Spread the Love to the Disadvantaged Groups in the Society

OneAsia, a subsidiary of the Legan Group, is honored to be the gold sponsor for the Sowers Action Charity Golf Tournament 2021. This event aims at raising funds to improve the education and living conditions of underprivileged children.

Funded by the Legan Group, the Legan Foundation aims at providing much-needed help for those suffering from difficulties, especially the elderly and youngsters.

Check out the interview with our Founder and CEO Charles Lee. Mr. Lee shared the foundation missions and the initiatives taken during the pandemic: <https://bit.ly/3q4lOkD>

Mooncake Donation - Sharing Love and Blessings

OneAsia, in collaboration with 12 NGOs, including the Boys' & Girls' Clubs Association of Hong Kong, Hong Kong Christian Service, and the Lutheran Church Hong Kong Synod, donated over 5,000 mooncakes to the solitary elderly and families in need. We aim at sharing love and care in the season of reunion and happiness.

Support for Underprivileged Students in E-Learning

Since the COVID-19 outbreak, online learning has become more centric in students' lives. OneAsia donated 50 computers and 70 data sim cards to students from low-income families to undertake e-learning at home through The Boys' and Girls' Clubs Association of Hong Kong and People Service Centre.
