

Providing Overseas Disaster Recovery Solution to Dot Commodity

Dot Commodity, Inc. was founded in 2004 and is based in Tokyo, Japan. The company provides online commodity brokerage services for individuals and institutional clientele. It offers trading tools, online account opening, financial futures and options brokerage services, and access to commodity markets and low trading costs. The company also provides contract for difference commodity derivative products; and over the counter brokerage services. In addition, it offers English language online trading system, which offers direct market access to commodity futures exchanges worldwide.

CHALLENGES

- Dot Commodity is having problem with the high volume of transaction data as well as high concern on the reliability of disaster recovery service. Stringent requirement on security to handle large amount of critical information is also urgently needed.

SOLUTIONS

- OneAsia's disaster recovery solution, custom made cloud service

BENEFITS

- Dedicated IT expert is assigned to customise a suitable disaster recovery solution based on OneAsia's top-grade private cloud
- User friendly platform is provided for easy data replication
- Rapid data recovery and fast retrieval of the files to reduce downtime

Dot Commodity is the largest and fastest growing online commodity futures broker in Japan. Located in the earthquake zone is an issue when deploying an effective disaster recovery plan that means Dot Commodity has to implement an overseas disaster recovery establishment in Hong Kong. In order to handle massive trading data, Dot Commodity requires a high standard of infrastructure which is capable to provide highly secure and reliable disaster recovery service to ensure a rapid recovery of critical data even an unexpected disaster or service outage in Japan.

After evaluating the performance of OneAsia's disaster recovery solution, it is clear to Dot Commodity that ComOneAsia's service is the best choice. OneAsia offers custom-made solution and it is integrated smoothly with robust cloud components such as server, storage, backup & recovery, monitoring and security; it also provides flexibility to meet client's unique business requirements. In addition, OneAsia has its own Security Operation Centre ensuring the data kept in its top-tier rated data centre are highly secured. By using OneAsia's disaster recovery service, Dot commodity can now fulfill its business continuity plan whilst expanding into overseas markets.
