

For Immediate Release

**Leading UK Insurance Company Selects OneAsia
for its Webmail Hosting Services**

Hong Kong, 4 Dec 2012 - OneAsia, the leading cloud solution provider in Asia today announced that a leading insurance company in the UK has selected OneAsia for its webmail hosting services.

The insurance is located in the UK and it is one of the leading insurance companies in the region. With over 6,000 insurance agents all over Hong Kong, the insurance company was searching for a highly secure and easy-to-use webmail hosting service that could enable its agents to check email anytime, anywhere. OneAsia was selected as the service provider was mainly due to the security, scalability and flexibility of its services.

To meet the stringent requirements on security, OneAsia has deployed its Security Operation Centre (SOC) support for tracking any unusual logon. In order to provide a more friendly user interface, OneAsia has customized the sign-on interface and fax-server integration. Furthermore, OneAsia has successfully migrated all the emails and contacts from the customer's legacy system to OneAsia's state-of-the-art email solutions.

With OneAsia's Email Anywhere, the insurance company enables its agents to keep a close communications with their customers as well as the company by using this easy-to-use and highly secure webmail services.
